DETAILED ACTION

Drawings

1. The drawings were received on April 27, 2006. These drawings are acceptable.

Response to Arguments

2. Applicant's arguments, see pages 12 and 13, filed April 27, 2006, with respect to claims 15-18 have been fully considered and are persuasive. The rejection of claims 15-18 has been withdrawn.
3. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., Van Court fails to teach or suggest the features of "sampling, during a synchronization process, a data signal successively using a clock signal at different frequencies which are associated with different transmission protocols; and checking the data signal, during a synchronization process, for the presence of protocol identification information associated with a selected clock signal until the protocol identification information is detected" as recited in claim 19) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 19-21 and 23-28 are rejected under 35 U.S.C. 102(e) as being anticipated by Van Court.

Van Court (US patent 5917552) discloses a video signal interface system 10 in Figure 1 for displaying video signals from various sources utilizing a deductive control technique for processing a video signal in response to measured characteristics associated the video signal.

The video signal interface system 10 comprises at least a sampling unit 18 for sampling video signals controlled by a clock signal ADCKL generated by a clock/timing generator (44); a PLL circuit 26; and a processor and memory 38 for controlling at least the sampling unit 18 and the clock/timing generator 44.

Figure 3 shows the detailed embodiment of the video signal interface system 10 of Figure 1.

Figure 3A shows the detailed embodiment of the PLL 26 and frequency dividers of the clock/timing generator 44.

With respect to claim 19, as shown in Figure 3 and Figure 3A, the PLL 26 for synchronization of the clock signal generated by the clock/timing generator 44; the controllable frequency dividers 234 and 236 are controlled by the clock/timing generator 44 which is controlled by the processor and memory 38; and the sampling unit 18 for sampling the video signals during a synchronization process using the ADCKL.

With respect to claims 20-21 and 23-28, the claimed subject matters are clearly shown in Figures 3 and 3A of the PLL 26, the clock/timing generator 44 and the control circuit of the processor and memory 38.

Allowable Subject Matter

6. Claims 15-18 are allowed.
7. Claim 22 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

8. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
